ACKNOWLEDGEMENT

First and foremost, We give all glory, honor and adoration to the Almighty God who has enabled us to go far in our professional pursuit. May His name be forever praised.

We are also indebted to our able Faculty, Mr Jonathan OBED who has always been there for us day and night. May God remember you for Good sir.

We cannot but mention our able Centre Manager, Mr Princewill... you are much appreciated Sir.

We appreciate our colleagues in the school as well as our Counsellor Miss Rashidat. God bless you all.

Finally,We appreciate our family, our Dads , Moms as Well as our Siblings for their constant support to make us great. God bless you all.

Thanks to all others we couldn't mention.

SYPNOPSIS

Amazing Bridges is a Web page that tells us detailed information about famous Bridges in the World. The website shows us the different categories of bridges in the world based on the Longest, Tallest, Oldest.

When a User visits the Website of **Amazing Bridges**, he or she can view the location of the bridge and also the history of the Bridge, and the user can also download the history of the bridge in document Format.

Amazing Bridges is beneficial in the following ways:

- . It provides detailed information about the famous bridges in the world.
- . Allows User to view the location of each bridge.
- . Allows User to download the full history of the Bridge in document format.

ANALYSIS

Each Project analysis is initiated for a purpose.

The aim of this project is to present detailed information about the various famous Bridges throughout the World. This Project was created and designed with these programming languages;

.HTML5

.CSS

.JAVASCRIPT

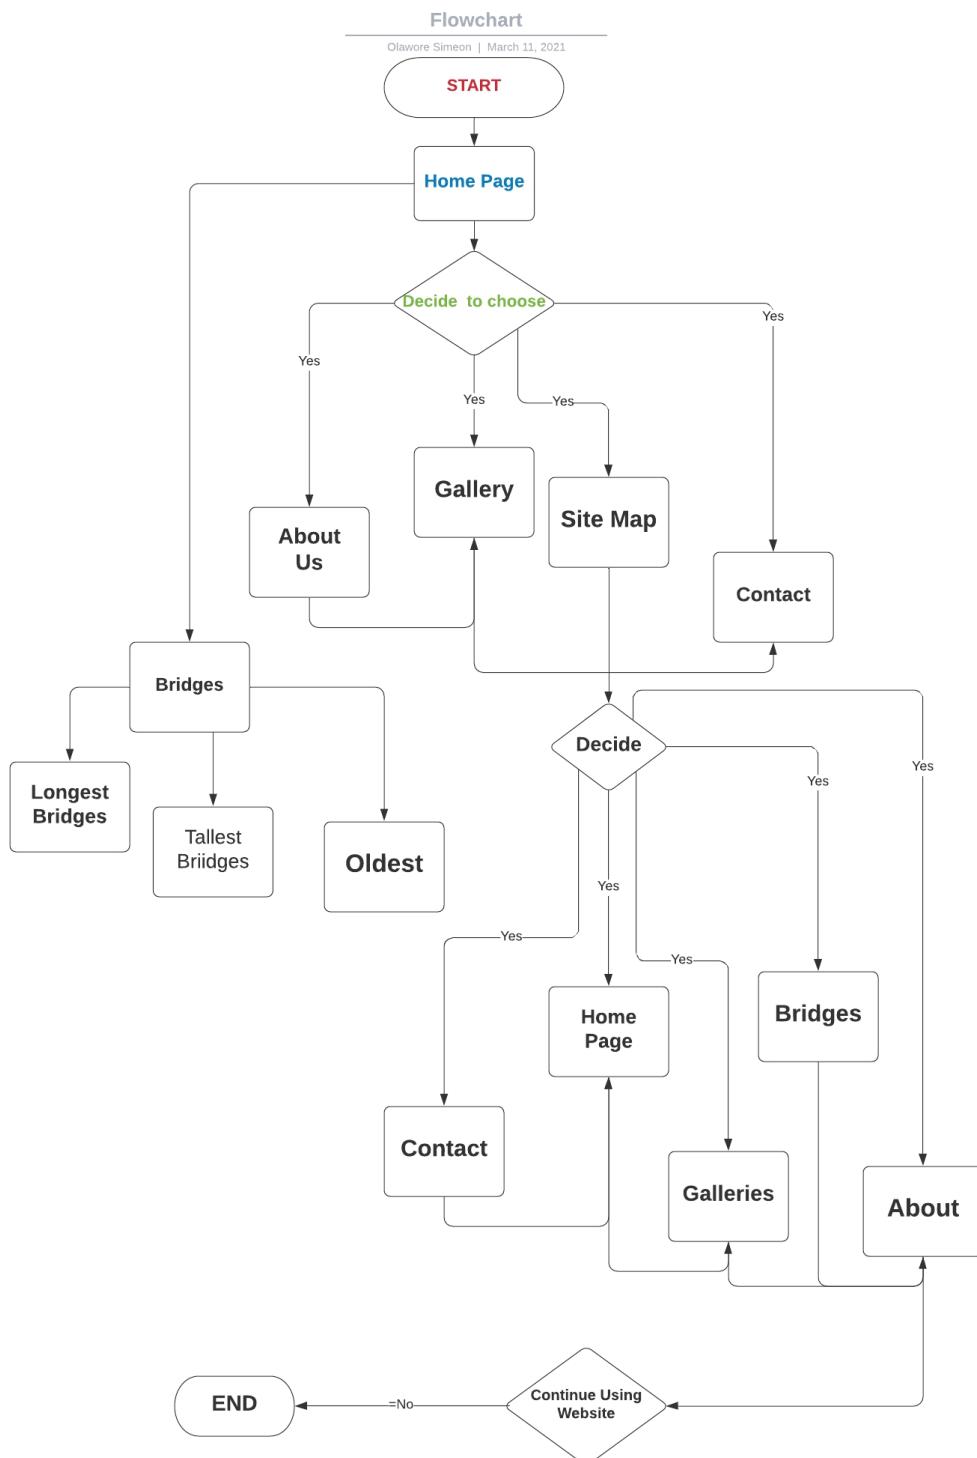

And also the website was created with these frameworks;

.Bootstrap4

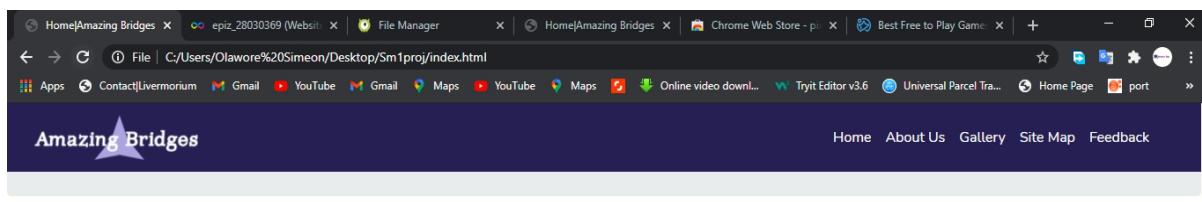

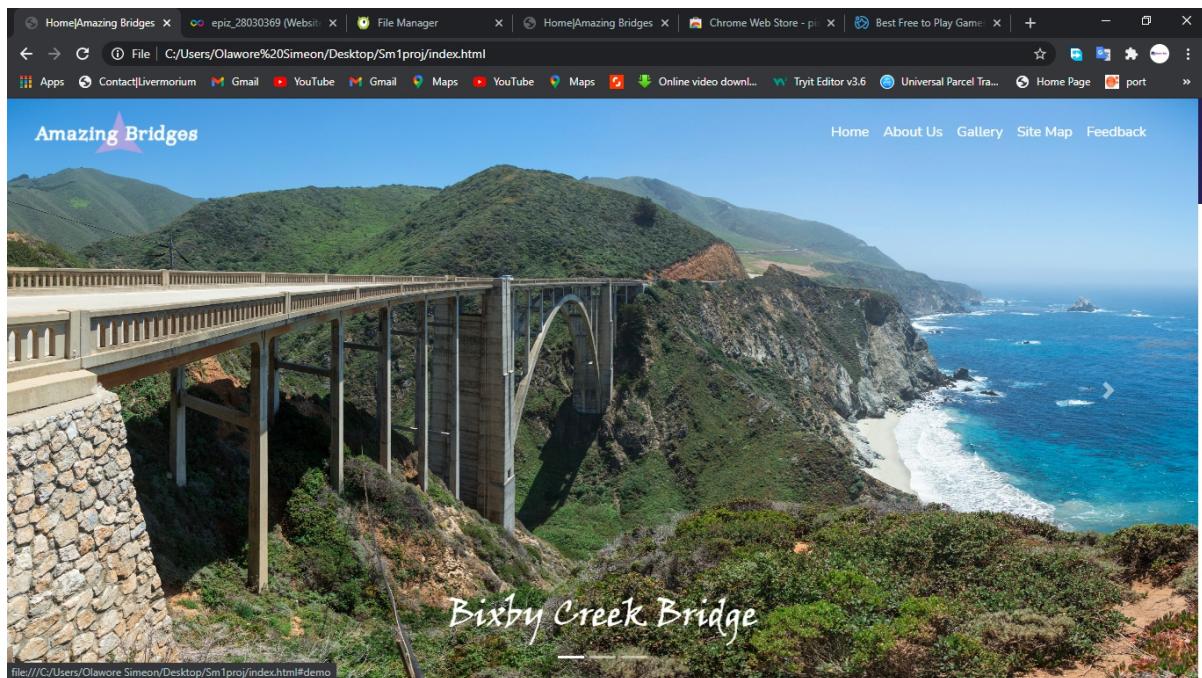

.Angular Js.

This Project started 12th of February and Successfully ended on the 10th of March.

Brooklyn Bridge from Manhattan

Brooklyn Bridge is a hybrid cable-stayed/suspension bridge in New York City, spanning the East River between the boroughs of Manhattan and Brooklyn.

Golden Gate Bridge

Golden Gate Bridge is a suspension bridge spanning the Golden Gate, the one-mile-wide (1.6 km) strait connecting San Francisco Bay and the Pacific Ocean.

Skydance Bridge

The Skydance Bridge is a pedestrian bridge and public artwork in Oklahoma City, Oklahoma, United States. Skydance bridge was completed 23 April 2012.

A bridge at night, illuminated with colorful lights reflecting in the water.

A suspension bridge, likely the Bay Bridge, during the day.

Another bridge at night, illuminated with white lights.

The screenshot shows a web browser window with multiple tabs open. The active tab displays the 'Amazing Bridges' website, which features a purple starburst logo and navigation links for Home, About Us, Gallery, Site Map, and Feedback. The main content area contains a heading 'The Royal Bridge, Colorado' and a detailed paragraph about the bridge's history and structure.

The Royal Gorge Bridge is a tourist attraction near Cañon City, Colorado within Royal Gorge Bridge & Park, a 360-acre (150 ha) amusement park located along the edge of the Royal Gorge around both ends of the bridge. The bridge crosses the gorge 955 feet (291 m) above the Arkansas River and held the record of highest bridge in the world from 1929 until 2001 when it was surpassed by the Liuguanghe Bridge in China. The Royal Gorge Bridge maintained the title of the world's highest suspension bridge until the Beipan River Guanxing Highway Bridge was completed in 2003, also in China. The bridge remains the highest bridge in the United States and was among the ten highest bridges in the world until 2012. The main span of the bridge between the towers is 880 feet (268 m), the total length is 1,260 feet (384 m), the width is 18 feet (5.5 m) and the towers are 150 feet (46 m) high. The steel base structure is covered with 1292 wooden planks.[6] Passenger vehicles are allowed to cross the bridge, but only before park attractions open or after they close, times depending on season. Oversize vehicles, including large trucks, RVs and buses, are not permitted to cross. The bridge was built in six months between June and November 1929 at a cost of \$350,000 (equivalent to \$4.2 million in 2019 dollars). In 1931, the Incline Railway, or simply the Incline (also known as a funicular), was added beside the bridge to reach the bottom of the gorge.[8] In the 1950s, a miniature railroad was built by the edge of the gorge and an aerial tram was opened in 1969. In the early 1980s, the bridge was renovated with new cable anchors, suspension rods and paint. A Skycoaster attraction was added in 2003, with riders being swung out over the edge of the gorge.

            &lt;hr&gt;
            &lt;!--Bridge History--&gt;
            &lt;p style="font-size: 20px; font-family: sans-serif;"&gt;&lt;b&gt;The Brooklyn Bridge&lt;/b&gt; looms majestically over New York City's East River, linking the two boroughs of Manhattan and Brooklyn. Since 1883, its granite towers and steel cables have offered a safe and scenic passage to millions of commuters and tourists, trains and bicycles, pushcarts and cars. The bridge's construction took 14 years and cost $15 million (more than $320 million in today's dollars). At least two dozen people died in the process, including its original designer. Now more than 125 years old, this iconic feature of the New York City skyline still carries roughly 150,000 vehicles and pedestrians every day.&lt;/b&gt;
            &lt;/p&gt;

The Royal Bridge, Colorado

<hr>

<!--Bridge History-->

<p style="font-size: 20px; font-family: sans-serif;">The Royal Gorge Bridge is a tourist attraction near

Cañon City, Colorado within Royal Gorge Bridge & Park, a 360-acre (150 ha) amusement park located

along the edge of the Royal Gorge around both ends of the bridge. The bridge crosses the gorge

955 feet (291 m)above the Arkansas River and held the record of highest bridge in the

world from 1929 until 2001 when it was surpassed by the Liuguanghe Bridge in China. The Royal

Gorge Bridge maintained the title of the world's highest suspension bridge until the Beipan River

Guanxing Highway Bridge was completed in 2003, also in China. The bridge remains the highest

bridge in the United States and was among the ten highest bridges in the world until 2012.

The main span of the bridge between the towers is 880 feet (268 m), the total length is

1,260 feet (384 m), the width is 18 feet (5.5 m) and the towers are 150 feet (46 m) high. The steel

base structure is covered with 1292 wooden planks.[6] Passenger vehicles are allowed to cross the

bridge, but only before park attractions open or after they close, times depending on season.

Oversize vehicles, including large trucks, RVs and buses, are not permitted to cross.

The bridge was built in six months between June and November 1929 at a cost of \$350,000

(equivalent to \$4.2 million in 2019 dollars). In 1931, the Incline Railway, or simply the Incline

(also known as a funicular), was added beside the bridge to reach the bottom of the gorge.[8] In the

1950s, a miniature railroad was built by the edge of the gorge and an aerial tram was opened in

1969. In the early 1980s, the bridge was renovated with new cable anchors, suspension rods and

paint. A Skycoaster attraction was added in 2003, with riders being swung out over the edge of the gorge.

</p>

            &lt;!--Bridge History--&gt;
            &lt;p style="font-size: 20px; font-family: sans-serif;"&gt;&lt;b&gt;The
Mackinac Bridge&lt;/b&gt; is currently the fifth
                longest
                suspension bridge in the world. In 1998, the Akashi Kaikyo
Bridge in Japan became the longest with a
                total suspension of 12,826 feet. The Mackinac Bridge is the
longest suspension bridge in the western
                hemisphere.
</pre>
```

The total length of the Mackinac Bridge is 26,372 feet. The length of the suspension bridge (including anchorages) is 8,614 feet. The length from cable bent pier to cable bent pier is 7,400 feet. Length of main span (between towers) is 3,800 feet.

Mackinac Bridge,Mackinac

<!--Bridge History-->

The Mackinac Bridge is currently the fifth longest suspension bridge in the world. In 1998, the Akashi Kaikyo Bridge in Japan became the longest with a total suspension of 12,826 feet. The Mackinac Bridge is the longest suspension bridge in the western hemisphere.

The total length of the Mackinac Bridge is 26,372 feet. The length of the suspension bridge (including anchorages) is 8,614 feet. The length from cable bent pier to cable bent pier is 7,400 feet. Length of main span (between towers) is 3,800 feet.

                Foresthill Bridge, California</b></h3>
            <hr>
            <!--Bridge History-->
            <p style="font-size: 20px; font-family: sans-serif;"><b>The Foresthill Bridge</b>, which soars 730 feet above the stream bed of the American River's North Fork, is reputed to be the 3rd highest bridge in the United States and the tallest in California. The bridge opened for public use on Labor Day, 1973. The 2,428 foot long span, with piers only 16 feet shorter than those of the San Francisco Golden Gate Bridge, was built at a cost of $13 million by the Bureau of Reclamation.

```

The bridge was built to span Auburn Lake, the reservoir that would have backed up into the North and Middle Fork canyons of the American River behind the Auburn Dam. If it had ever been built. The dam project was abandoned and the bridge now spans the North Fork canyon. The surrounding land is owned

by the Auburn Recreation Area and is a favorite for outdoor enthusiasts.

                Zhongxian Changjiang, Bridge<b></b></h3>
            <hr>
        <!--Bridge History-->
```

A major link in the new highway that goes from

Yichang to Xhongxian and then to the city of Chongqing, this new cable stayed crossing has the

unique distinction of having the highest deck height of any bridge ever built over the Yangtze River

if measured to the full level of the 3 Gorges reservoir. Even the 3 great Yangtze River arches -

Chaotianmen, Wanxian and Wushan - are all a few meters short of the 276 foot (84 mtr) deck to water

distance beneath the Zhongxian Changjiang bridge. The river is unusually wide at the crossing and

required a large prestressed beam span of 200 meters in addition to the usual 3-span cable stayed

configuration. The name Chang Jiang is the Chinese name for the Yangtze River which is good as it

differentiates this bridge from the nearby Zhongxian Yangtze River bridge - a suspension span from

2001 located just downstream from the new cable stayed bridge.

            <hr>
            <!--Bridge History-->
            <p style="font-size: 20px; font-family: sans-serif;"> <b>The Kingston Bridge</b> is the second oldest remaining bridge in Somerset County. It was built in 1798 to replace the wooden bridge burned during the Revolution, and is the county's largest stone road bridge, consisting of four arches. The bridge was constructed to carry the King's Highway, now Route 27, over the Millstone River. This road was an important stage coach line that crossed the state between New York and Philadelphia. The Kingston Bridge is an excellent example of late eighteenth century masonry. The bridge was closed to traffic in 1963 and is now part of the Delaware & Raritan Canal State Park.

            <hr>
            <!--Bridges History-->
            <p style="font-size: 20px; font-family: sans-serif;"><b>The Kapellbrücke</b> (literally, Chapel Bridge) is a covered wooden footbridge spanning the river Reuss diagonally in the city of Lucerne in central Switzerland. Named after the nearby St. Peter's Chapel, the bridge is unique in containing a number of interior paintings dating back to the 17th century, although many of them were destroyed along with a larger part of the centuries-old bridge in a 1993 fire. Subsequently restored, the Kapellbrücke is the oldest wooden covered bridge in Europe, as well as the world's oldest surviving truss bridge. It serves as the city's symbol and as one of Switzerland's main tourist attractions.</b>

            <!--Bridge History-->
            <p style="font-size: 20px; font-family: sans-serif;">Old
<b>bridge of Dezful</b> is one of the most valuable
monuments of Khuzestan province with approximately
1800years history. This passage is also known as
Sassanid bridge because it was built in the time of Shapur
the first. Dezful was previously named
Dezhpol (meaning castle- bridge) that refers to a castle
which was built near the bridge in the
past.

```

This bridge was built by the captured army of Rom after its failure against Sassanid soldiers and that is why it is named Roman Bridge, too. In that period of time, the roman bridge connected

Jondishapur to Mesopotamia.

Here is one of the oldest brick bridges of the world that is still standing. However, the asphalt current passage has been built over the old foundations and the restorations in different periods have changed the original structure.

Cars were permitted to pass through the bridge till 1389 SH, but since then only walking is possible on the bridge.

</p>
